

The following list contains some key points that a manuscript must be complied with.  
Please note that this sheet is guide to review and should not be used as a review form.

## Original Papers

### Title

Proper reflection of the contents  
Concise  
Not a questioning form  
Not a declarative form

### Abstract

Complete yet succinct  
Independent  
Proper length

### Introduction

Informative but brief background for the readers  
The present scientific gap described  
Study rationale adequately described  
Clear statement of the objectives of investigation

### Materials and Methods

Proper Sampling  
Clear inclusion/exclusion criteria  
Clear description of methods  
Scientifically acceptable methods  
Study design consonant with the objectives  
Adequately described ethical issues

### Results

Providing the expected results  
Proper statistical analyses and reports  
Results in line with the study's objectives

### Discussion

Already published studies mentioned  
Well description of differences/similarities with other studies  
Discussing the potential limitations of the study

### Conclusions

A brief conclusion according to the study's questions  
Acceptable degree of certainty in the conclusion

### References

Valid and up-to-date  
Style complied with the journal's format

### Tables and Figures

Informative  
Additional data to the text  
Proper number/amount

### And...

The paper is original  
No misconduct (plagiarism/fabrication/falsification/duplicate publication)  
The paper adds to the global knowledge

## Case Reports

### Title

Proper reflection of the contents  
Concise  
Not a questioning form  
Not declarative

### Introduction

Informative but brief background for the readers  
Importance of reporting the case adequately described

### Case Report

Providing all necessary data of the case  
Reasonable diagnostic and therapeutic interventions  
Convincing evidence for diagnosis

### Discussion

Already published studies/case reports mentioned  
Well description of differences/similarities with other cases  
Proper interpretation of the diagnostic/treatment measures  
A brief conclusion according to the report  
Acceptable degree of certainty in the conclusion

### References

Valid and up-to-date  
Style complied with the journal's format

### Figures

Informative  
Additional data to the text  
Proper number/amount  
Desirable resolution and quality

### And...

The paper is original  
No misconduct (plagiarism/fabrication/falsification/duplicate publication)  
The paper adds to the global knowledge
