The start of a new medical journal is highly dependent on its recognition by the contributors and reviewers, and in the case of the *Iranian Journal of Kidney Diseases (IJKD)*, we were fully supported by a considerable number of the colleagues in the community of Iranian nephrologists, and even by other researchers and physicians from Iran and other countries. To acknowledge this kind of cooperation, the Iranian Society of Nephrology held a ceremony in August 2008, and invited the peer reviewers and contributors of the *IJKD*. At this friendly gathering in Esteghlal Hotel in Tehran, after the welcome speech by Dr Ezzatollah Abdi, the president of the society, a report on 1.5-year activity of the editorial team was presented by the editor-in-chief of the *IJKD*, Dr Mohsen Nafar. Then, 10 reviewers with the highest rates of commentaries during the past 1.5 years were acclaimed. In addition, to encourage the researchers who chose this newly established journal for their papers, the authors of the 10 most-downloaded papers from the journal's web site were introduced and praised, as well. In this last issue of the 2008 volume of the *IJKD*, the editorial team would like to acknowledge again a depth of gratitude to the following colleagues who have done us the great favor of peer reviewing of the submitted manuscripts over the past 2 volumes:
